Making the Most of Your PACE Program

September 2008

ANNOUNCING NEW

FEATURES

AND ENHANCEMENTS

Admissions/Discharges

We've added new data fields to capture details of Emergency Room, Hospital, and Nursing Home admissions and discharges.

Collapsible Sections on Forms

Do you hate scrolling? So do our users, so we've added sections to our Assessment forms. Now it's easier to navigate through long forms by clicking on a + or - box to expand or collapse sections.

Group Authorizations

A new process for approving multiple, recurring service authorizations will allow faster workflow to approve repetitive services such as dialysis.

Catholic Health East selects Mediture

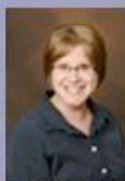

Catholic Health East has purchased the TruChart LIFEconnect suite of products for use at the system's headquarters and five PACE sites in three states.

"Mediture will help us design and implement a standardized software solution to support our Regional Health Corporations' expansion in the PACE model of care. It will promote the use of best practices across all stakeholders within Catholic Health East," said Donette Herring, Chief Information Officer for Catholic Health East.

Implementations are currently underway for:

- Mercy LIFE in Philadelphia, PA
- LIFE St. Francis in Trenton, NJ
- LIFE at Lourdes in Camden, NJ
- LIFE St. Mary in Langhorne, PA
- St. Joseph of the Pines PACE, Southern Pines, NC

LOOK FOR US AT NPA PORTLAND IN OCTOBER!

Hannah Bergstrom de Leon
Project Manager

Brenda Vatland
Account Executive

Kiran Simhadri
Chief Technology Officer

Our team will be presenting an educational session titled "Reporting, Reporting, Reporting! How to Orchestrate Your PACE Program's Operations through Reporting."

Our session is Wednesday, October 29 from 8:30-10:00 a.m.

We will discuss how an EHR can give your staff tools for collecting data and automating the reporting processes. We'll give examples that show how to use reports effectively to improve your PACE program's operations, such as quality improvement and financial accountability.
