

Connections

Making the Most of Your PACE Program

June 2008

It's 3 a.m. and the phone rings . . .

Who do you want answering the phone?

On-call staff with paper records . . .

-OR-

On-call staff with TruChart LIFEconnect

ANNOUNCING NEW FEATURES AND ENHANCEMENTS

• DataPACE2 reporting

Our software now maps all captured data fields to extract information seamlessly. Now at the click of a button, you'll be able to eliminate manual compilation for DataPACE2 submissions.

• Improved Scheduling

Customers can now define their own scheduling print templates, including Participant name, address, event information and transportation schedules. We've also made scheduling recurring events easier, with overbooking notices to alert you if there is a conflict.

• Assessments

Updates to Physical Therapy, Occupational Therapy, Intake, Dietary and Social Work assessments incorporating user community feedback.

Mediture offers a program to help new PACE sites get started with an EHR from day one. We've heard from our clients that start-up costs for a new program can make purchasing software out of reach. We've responded with a model that turns two luxuries into necessities:

- Comprehensive EHR software for PACE
- Hosting services with IT staff

Start small and scale as your census grows. With our pay-per-participant monthly pricing, you can defer expensive start-up costs until your site is producing more revenue. Wouldn't it be great to open your center with trained staff using advanced technology, instead of losing productivity when you eventually decide to switch to an EHR? And operating with a small staff requires maximum efficiency. . . EHR's are proven to boost employee productivity and improve communications. Let our experienced IT team handle your technical needs, and save on human resources expenses and headaches. Call us today to find out how Mediture can help you reach your business objective of opening your center with an EHR in place.

The ONE SOLUTION for PACE Programs
